Subject: Microsoft Settlement

Dear Sirs,

Leadership in technology has made America the world leader in virtually all fields. It is with this in mind that I ask you to implement the Microsoft Settlement. Fairness should be the goal, not punishment.

Technology companies are making the market competitive, despite the power Microsoft has gained. Thousands, like myself, are turning to Linux and other operating systems, because they are better, not because a government lawsuit will cripple Microsoft. Open fair competition will make the difference.

Sincerely,
Don Small
